AIRBRUSH

....Perfect fine lines and needle protection....

....Easy needle locking....

....Pre-set for perfect control....

....Smooth double action triggering....

The DAGR airbrush - precision engineered by DeVilbiss.

The demand from professional automotive artists, custom painters and pin stripers is growing and they demand the very best build quality and performance from an air brush.

That's why DeVilbiss, the inventor of the original "Aerograph" air brush has launched the ultimate in airbrush technology, to meet the needs of the most demanding professional.

Precision engineered in the U.S.A. with a lightweight body finished in copper, nickel and chrome, the DAGR airbrush by DeVilbiss is perfectly balanced with a smooth, double action trigger to ensure the artist can achieve the finest hairline details to smooth shading with most popular automotive paints and lacquers.

Fitted with a crown cap to aid fine line work and protect the needles, the DAGR can be used with or without the 9ml (1/3rd oz) gravity paint cup supplied.

Solvent proof fluid passages and a Teflon® needle packing ensure reliable, long lasting performance and every DAGR air brush is hand tested at the factory, before being packed into its unique storage tin together with its maintenance spanner.

Also available for the DAGR air brush is a 3m (10') braided nylon air hose with 1/4" NPS swivel connections and a repair kit containing "O" rings, needle spring and washers.
