New TEKNA® Basecoat Spray Gun from DeVilbiss Automotive Refinishing

DeVilbiss Automotive Refinishing has introduced the ultimate basecoat spray gun. The new TEKNA® Basecoat spray gun is designed to spray well at low pressures with exceptional metallic control and reduced overspray. TEKNA® Basecoat is the first in a series of material-specific, premium spray guns from DeVilbiss

The TEKNA® Basecoat guns come with an all new HVLP air cap and have optimal performance when sprayed at 14-18psi. The TEKNA® Basecoat spray guns achieve excellent results with both waterborne and solvent based materials.

This full size gun is anodized inside and out for corrosion and scratch resistance. All TEKNA® Basecoat kits include an HV20 air cap, two fluid tips, HAV-555 digital gauge, gun wrench and color ID rings. Kits are available with or without an aluminum cup.

The new TEKNA® Basecoat guns will begin shipping on March 1, 2016 and are now available for pre-order in the United States and Canada.

DeVilbiss Automotive Refinishing (www.autorefinishdevilbiss.com), a division of Carlisle Fluid Technologies, is a leading global designer and manufacturer of refinishing equipment and productivity products. DeVilbiss offers a broad range of solutions for the refinishing market including spray equipment, disposable paint cups, air filtration, dirt control products, and more.
