

Gunner Cup

by DeVilbiss

Flow.

- The vented system and large filter design allow for better fluid flow and color match
- Less fluid flow restriction and starvation make it an ideal solution for spraying waterborne and clearcoats.

Cups, Lids & Adapters

| Order No. | Model No. | Description | Qty/Pkg | List Price |
|-----------|-----------|---|---------|------------|
| 803431 | DMK-621 | 24 oz. cup/filter lid – 125 micron blue filter | 48 | \$ 98.10 |

DEVILBISS
AUTOMOTIVE REFINISHING

Quick Start

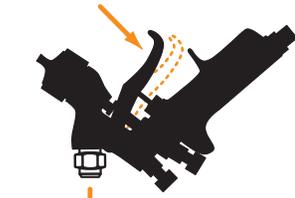

(A)

Use thumbs. Press firmly around the edge for a tight seal.

(B)

1. Squeeze trigger

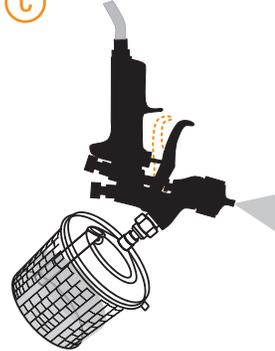

2. Use slight downward pressure. Use stem lugs for secure connection to lip on the adapter.

3. Position air valve toward rear of gun.

(C)

Connect hose, squeeze trigger, and purge air valve prior to painting.

(D)

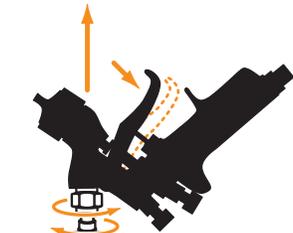

Paint.

LID REMOVAL

(E)

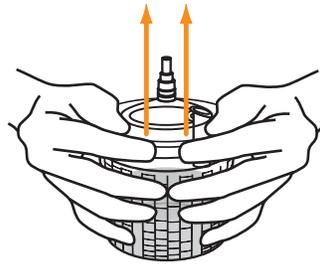

1. Squeeze trigger to drain fluid.

2. Twist and pull up on the gun.

(F)

With the lid tab facing away, use forefingers to open lid. Allow paint to drain from the lid into the cup prior to opening completely.
